WOMAN BIG GAME HUNTER AND LION SHE KILLED

Miss Martha Miller, 23 years old, standing beside the lion that she shot on Rundi Plains in the Belgian Congo, Africa. She was a member of the Akeley exploring and hunting expedition, which returned to New York March 14. She shot the lion from a thorn thicket by moonlight, her bullet striking his backbone and paralyzing him. Another bullet gave him the coup de grace. He had a fine skin and mane and weighed 400 pounds. Later on Miss Miller brought down an elephant with a single shot.

Ireland Still Perturbed Under the New Regime

THE pathway of the new Provisional Government of Ireland has not been strewn with roses, and the troubled island is still in a very disturbed condition. The differences between Ulster and Southern Ire-

land have not been composed, and the sentences recently imposed in an Ulster court on the eleven "footballers," who were charged with having gone into Ulster in order to incite trouble, is likely to prove a further cause

of exasperation. More prolific of danger perhaps are the clashes that have recently occurred between the followers of De Valera and those of Arthur Griffith and Michael Collins, the leaders of the Provisional Government. Collins at a recent

meeting was threatened with violence, revolvers were discharged near the platform on which he was speaking, and he was threatened with death if he approached the graves of those who had died in the Republican cause.

This old building is said to be the only one on Main Street, Columbia, S. C., which was not burned when Sherman made his famous "march to the sea." The story attached to it is that a French Consul was in Columbia at the time of the fire and saved the building by proclaiming it French property.

FAMILY WHICH INDICATES THAT RACE SUICIDE IS NOT POPULAR IN KENTUCKY

Mrs. Charles Lenahan of Louisville, Ky., and her family of eleven children. Mr. Lenahan was not present when the photograph was taken. A singular fact is that he has a brother living in the same city, Mr. Joseph E. Lenahan, who by a coincidence also has eleven children, and a friendly race seems to have developed as to which shall hold the record. Joseph was behind until a few weeks ago, when young James Patrick Lenahan arrived and evened up the score.

ARATHER unique experience was that of the Prince of Wales when he met the Begum of Bhopal. He saw nothing of his hostess save two searching black eyes regarding him steadfastly through a triangular slit, for the Begum never shows her face in the presence of a man.—The dangers inherent in wooden cars were again demonstrated in the Georgia train wreck where the cars were reduced to

splinters.—The storm at Warrenville, S. C., was only a part of the great tornado that swept over Georgia and South Carolina, causing vast damage and many fatalities.—Representative Joseph Cannon of Danville, Ill., the oldest in years of service of any living Congressman, has conceived and executed the plan of preparing his own tomb in advance of his death. archery was that shown in the contest between archer and golfer pictured above. At the 17th hole the archer shot a distance of 250 yards and came within four yards of the hole.—The destruction of contraband liquor illustrates once more the pertinacity of "Izzy" Einstein, the prohibition agent who was largely responsible for its capture.—Childish shyness and self-consciousness are charmingly evident in the

figure of the little playmate or visitor of the Prochnik children who has stolen surreptitiously into the picture.—The snow sculpture of a woman shown above is caused by the peculiar configuration of the mountainside, which causes the snow to linger longer in certain places.—The intelligence of dogs and their capacity for a high degree of training are strikingly illustrated by the feats of German police dogs, who seem to be guided by reason rather than instinct.

Studies of Aborigines by Young American Artist

EXCELLENT in their technique and interesting as studies of a race that is rapidly disappearing are these studies made by a young American artist, Mr. W. Langdon Kihn of New York. They were made on the Blackfoot Reservation in the vicinity of Browning, Mont., from native types. Under the auspices of the Directors and Regents of the Art Museum of Santa Fe, N. M., the originals are now on exhibition in New York City. The artist has studied in American schools and his work admirably depicts the characteristic features of the aborigines who once ranged over the prairies of the West and who have received too little attention from American artists.

Grave South African Disorders

SERIOUS disorders have taken place recently in South Africa, accompanied by considerable loss of life. The revolt is claimed by the authorities to have been caused by communistic and syndicalist leaders. The strikers, on the other hand, assert that white labor is to an increasing degree being supplanted by black, which, it is alleged, tends to make decent living conditions difficult, if not impossible. The outbreaks were so sanguinary and widely spread that it became necessary to declare martial law and employ large forces to put down the uprising. At latest reports the authorities had the matter well in hand. The quelling of the disorder was largely due to the free employment of bombing airplanes to disperse the rebels and drop food and ammunition to besieged royalists. Johannesburg, which at one time was invested on three sides, has been relieved and Krugersdorp, the western limit of the fighting, has been captured by Government troops. It was believed in official circles that there would continue to be small setbacks, such as the loss of isolated posts, but little doubt was felt as to the ultimate suppression of the revolt. A proclamation was issued by Premier Smuts declaring that with the co-operation of the loyal citizens who were actively supporting the Government it should not take long to re-establish peaceful conditions. The outstanding feature of the situation, he said, had been the exemplary conduct of the natives.

Mounted troops patrolling mine property in the vicinity of Johannesburg, South Africa, where for some weeks past serious labor troubles have occurred, attended with the loss of many lives and the destruction of mine machinery and other property. So grave did the troubles become that martial law was declared.

Your feet were like this

THE baby girl is born with perfect feet and hands.

She grows to womanhood. Her hands are still perfect.

Her feet? Men who are in a position to know estimate that from 65% to 85% of the women today have not only very imperfect feet, but the majority have some form of foot trouble.

Why do the feet lose their perfection when the baby grows to womanhood—and needs good feet more than ever?

Shoes. There can be no other answer. It is true the human foot carries a load and is taxed daily. But Nature, in her infinite wisdom, designed the human foot to carry its load, to do its full duty in the life of every woman. Nature has been thwarted and abused and restrained by the artificial footwear made by man.

The nearest approach to nature, while retaining every desirable feature of style, is found in the Cantilever Shoe. It is shaped to the natural lines of the foot. The arch is flexible, like the human foot—not rigid as in ordinary shoes.

The flexibility of the Cantilever shank permits the foot muscles to have free action and assures an easy, graceful step in walking. Exercise strengthens the arch muscles and all through life they never fail to hold in place the small bones forming the foot arch.

CANTILEVER heels are graceful and sensible. They promote good posture, which conduces to good health.

The wonderful Cantilever arch hugs the instep, when the shoe is laced, and affords a gentle, restful support to the foot without unnatural restraint.

Circulation is free. The foot is unrestrained in Cantilever Shoes—free! You can walk with more pleasure and less fatigue. You stand with greater patience. A new ease in shoes delights you—makes those marvelous feet of yours strong, healthy, beautiful, — and comfortable!

If no dealer listed at the right is near you, write to the manufacturers, Morse & Burt Co., 11 Carlton Ave., Brooklyn, N. Y., for the Cantilever Shoe Booklet and the address of a nearby dealer.
